RoomScore User Guide

Quick reference for daily use and administration

Dashboard

- Review inspection-in-progress, pending assignment, pending inspections, pending issues and delayed issues.
- Use department-wise counts to identify pending work.
- Use Room Score to review asset inspection scores and issue counts.

Masters

- Maintain Floors, Asset Types, Assets, Departments and Users.
- Assign users to the correct role and department.
- Keep master data active and accurate before starting inspections.

Sectionwise Checklists and Templates

- Create sections and checkpoints in Sectionwise Checklists.
- Create inspection templates and select the applicable sections.
- Assign templates to the required assets or categories.

Inspections

- Select the asset and start the assigned checklist.
- Mark each checkpoint Yes or No and add remarks/evidence where required.
- Save progress when an inspection is incomplete and submit when complete.
- Review completed inspections from Inspection History.

Issues

- No responses can create issues automatically; manual issues can also be added.
- Assign pending issues to the responsible employee with a due date.
- Update issues to In Progress, resolve them with remarks/evidence, and review resolved issues.
- Use delayed issues to identify overdue work.

Periodic Task

- Use Add Periodic Task to create a recurring task with periodicity, applicability, department and start date.
- Use Periodic Task to review or edit configured recurring tasks.
- Use Upcoming Periodic Tasks for future cycles and Due Periodic Tasks for work that is due/in progress.
- Complete due periodic tasks asset by asset.

Occupancy

- Record Security Occupancy Count for the selected date.
- Update Office Count where required.
- Review Occupancy Check for asset-wise status.

Search, Filters and Excel

- Use Search to quickly locate records in the current view.
- Use Filter where available to narrow records.
- Use the Excel download icon to export supported tables.

Settings

- Update Property Name, Property Logo and application theme settings.
- Use maintenance tools only when required for repair, page regeneration or checklist installation.

Mobile Use

- Use the mobile menu to navigate between views.
- Inspection, issue and periodic-task workflows are designed for phone use.
- Use the phone camera for photo/video evidence where the form provides evidence controls.

Daily Workflow

1	Review Dashboard
2	Complete due inspections / periodic tasks
3	Assign pending issues
4	Update and resolve assigned issues
5	Review occupancy and scores
6	Export records when required
